Narration 1

Earth is a beautiful place! This wonderful planet is overflowing with natural resources. The ocean is full of fish and marine life. The forests are full of animals, birds, and trees. The soil is the perfect substance for our agricultural crops to grow in, and rock formations contain deposits of precious metals, minerals, and ores.

And all over the Earth, rain falls, rivers flow, sunlight radiates down, and the wind is stirred.

What a magnificent place to live in this great big universe!

But this beautiful planet needs our help if it is to continue to sustain all of us, and if its natural resources are to be enjoyed by future generations. We need to work together to find solutions to the problems that threaten our air, our water, our land, our food sources, and ultimately our homes and the habitats of the other creatures that share our planet.

This world needs our help!
